Supabase

# Hello,

# I'm Spencer Mabasa Tasa

Full-Stack Software Developer

I am a Full-Stack Software Developer with expertise in Django and Supabase, complemented by strong skills in JavaScript, HTML, CSS, and jQuery. Over two years, I rebuilt a dynamic project in Django and developed a School Management System and a Guesthouse Booking System. I also built a portal that extends the functionalities of "Xcally," a contact center system, while seamlessly integrating with its database. My focus is on delivering scalable and efficient web solutions tailored to client needs.

# **Working Experience**

#### SUPPORT ENGINEER

Job at Market Mavens Tech (2023 - present day)

My responsibility is to make sure the software we deploy on Market Mavens clients servers, is operating as expected. This envoles troubleshooting and resolving any issues that may arise and some times even setting up configurations and training the users on how to use the software.

#### SOFTWARE DEVELOPER

Job at Market Mavens Tech (2024 - present day)

Gather and evaluate user requirements in collaboration with product managers

# **Proiects**

#### **XCALLY EXTENSION PORTAL**

Job for FBC holdings (completed and deployed)

A portal that extends the functionalities of "Xcally," a contact center system, while seamlessly integrating with its database.

#### **XCALLY OPEN CHANNEL GATEWAY**

Job for OutRisk (completed and deployed)

A web app that enables compatibility between the XCally Open Channel API and the Twilio API, allowing WhatsApp traffic to flow in and out of the XCally contact center system.

#### **TICKETING SYSTEM**

Task at Market Mavens Tech (completed and deployed)

A ticketing system that centralizes customer requests, incidents, and support tasks into a single platform, enabling efficient tracking, assignment, and resolution.

#### **ONLINE SHOP FRONT**

Personal Project (completed)

An online storefront that showcases products, processes secure payments, and provides customers with a seamless shopping experience.

#### **GLYCOGEN CLOUD**

Personal Project (still in development)

A SaaS platform offering developers and designers a suite of tools, including OpenAl API access, through an intuitive interface like OpenAl's own, with flexible on-demand billing.
